To: 'ctimpy@nhcgov.com'
Subject: PRLF Footprint GIS layer is published on the DWM website.

Cathy,

I'm mailing a letter to you with information about the landfills. However, I think this is probably most of the information you need.

Data: http://portal.ncdenr.org/c/document_library/get_file?p_l_id=116721&folderId=364024&name=DLFE-30316.zip

Re: New Hanover County Pre-Regulatory Landfills

Dear Ms. Timpy:

Thank you for your interest in the location of pre-regulatory landfills in your county. As we discussed during the Flemington Landfill site visit, a list of pre-regulatory landfills sorted by county can be found on our website at <http://portal.ncdenr.org/web/wm/sf/ih/soldlf>. Information provided with this letter is both from our database and site summary reports we currently have in our files. The waste disposal areas for many of our sites have been put into a GIS layer. Because you already expressed interest in a GIS version of data, the links will be emailed to you. If you have any questions or would like further information, I may be reached at 919-508-8420 or analee.thornburg@ncdenr.gov.

Sincerely,

Analee Thornburg

Subject: Pre-Regulatory Landfill Sites in New Hanover County

Dear Mr. Shell:

The General Assembly of North Carolina enacted Senate Bill 1492 which created a program to assess the public health and environmental hazards at landfill and dump sites that operated prior to 1983 and to develop and implement remedial action plans at sites requiring remediation. The Pre-Regulatory Landfill Unit (Unit) was created in the Inactive Hazardous Sites Branch (IHSB) to oversee these activities. The purpose of this letter is to make you aware of the sites identified in your county and to provide general guidance of relevant state statutes.

Based on the information obtained by the Unit, the sites listed below tentatively qualify under Senate Bill 1492. The approximate locations are shown in the attached map.

<u>ID Number</u>	<u>Site Name</u>	<u>Site Address</u>
NCD980503056	Flemington LF	Flemington Rd
NCD986171973	McRae Street LF	McRae St
NCD990715070	New Hanover Co & Carolina Beach Landfill	Dow Rd.
NONCD0000105	Corbett Packaging Co. LDFL	NC 117-133 North
NONCD0000457	Barfield's Dump	Southerlands Ave.
NONCD0000458	Carolina Beach Refuse Disposal	Dow Rd.
NONCD0000459	Castle Hayne Service Dump	5 Miles Off Hwy. 17 Off SR 1335
NONCD0000460	Castle Hayne Trash Service	SR 1002, Near Castle Hayne
NONCD0000461	Kure Beach Refuse Disposal	Sunny Point Safety Zone
NONCD0000462	Military Cutoff Landfill	620 Old MacCumber Station Road
NONCD0000463	New Hanover Co. Landfill	Dow Rd.
NONCD0000464	Wrightsville Beach Dump	200 Parmele Blvd.
NONCD0000465	Blue Clay Rd. LF	Juvenile Center Dr.
NONCD0000466	Wilmington Landfill	Martin Luther King Parkway & North 23rd Street

NONCD0000467	Rural Garbage Service	SR 1524
NONCD0000695	Burnt Mill Creek LF	Stanley St.
NONCD0000756	Wilmington LDFL (Kidder St)	1225 13th St.
NONCD0000757	East Lake Shore Drive LF	East Lake Shore Drive
NONCD0000758	Wisteria Dr. LF	2126 Wisteria Dr.
NONCD0000759	Tallman Clay Pit	16th Street
NONCD0000760	Optimist Ball Park	South Front Street

Work at these sites may be performed using the Unit's resources or through local government actions. The Unit has prioritized the sites statewide based on their threat to public health and the environment and will perform assessments and implement remedial actions based on this priority. Local governments may opt to perform the work at any time under the guidance of the Unit. Reimbursement of local government costs may be available for assessments and remedial actions to abate an imminent hazard as funds are available. The conditions for reimbursement include approval of the assessment and remediation plan by the Unit and certified accounting of costs. A document, *IHSB Guidelines for Addressing Old Landfills & Dumps*, was developed to assist local governments and the Unit in this work. It is available on our web site, <http://portal.ncdenr.org/web/wm/sf/ihb/ihsguide>.

An additional purpose in notifying you of these sites is to provide information to assist in your responsibilities in the permitting of private drinking water wells. The General Assembly enacted legislation which required local health departments to implement programs for the permitting, inspecting, and testing of private drinking water wells by July 1, 2008. State well construction standards in 15A NCAC 2C require a minimum horizontal separation of 500 feet between a water supply well and a landfill or disposal site. More precise location information for the sites in your county may be requested from the Unit.

If you are aware of additional sites, have additional information on the identified sites, or need further information, please contact me at (919) 508-8473.

Sincerely,

Patricia M. Backus, P.E.

<SAL> <FIRST> <LAST>, County Manager
County of <MUNICIPALITY>
<ADDRESS>
<TOWN>, North Carolina <ZIP>

Subject: Assessment, Cleanup, and Redevelopment of Old Landfill Sites Within Your Jurisdiction

Dear <SAL> <LAST>:

Governor Easley released his proposed budget February 22, 2007. Included in the budget is a specific item I believe should be of interest to you from a fiscal, environmental and public health protection perspective.

There are approximately 700 old landfills statewide and <LANDFILL#> old landfills in your local area that closed before the State permitting system became effective. These landfills are listed on the Old Landfill Sites portion of the Inactive Hazardous Sites Inventory maintained by the Superfund Section, Division of Waste Management. Any person, including local governments, that arranged for disposal or disposed of waste in the landfills may be held liable for the cleanup of the site. I have attached a report that identifies the location of known old landfill sites in <COUNTY NAME> County that may have closed prior to 1983 and thus qualify for the program described in this letter.

The Division has surveyed old landfills in 47 counties. The results of the survey indicate reason for concern about potential public health and safety impacts of these sites if they are not addressed. Seventy percent of the sites surveyed had a school, church, residence, day care or drinking water source within 1000 feet. The Division has found 102 old landfills that have a drinking water well within 500 feet. Thirteen of the landfills surveyed have residences built over the old landfill. The cost of assessment and cleanup of these old landfill sites can be as high as several million dollars.

Governor Easley's budget establishes a partnership between the State and local governments to both clean up the old landfill sites and provide funding for redevelopment of the sites. Many are in prime locations for redevelopment opportunities. The Governor's budget proposes to pay for cleanup and redevelopment of these sites through a surcharge on disposal of solid waste. The funding mechanism is a fair one. It is based on the idea that those who use solid waste disposal facilities should share responsibility for cleanup of sites used for solid waste disposal in the past that may have been lawful at the time, but did not meet standards that we now know are necessary to protect public health and safety.

The proposed \$2.00 per ton disposal surcharge would apply to residential, commercial, industrial, and construction and demolition debris type waste that is either disposed at a landfill or passes through a transfer station for disposal out-of-state. The State would use revenue from the surcharge to contract for cleanup of the old landfill sites and to provide grants to local government for redevelopment. The funds could also be used across the state to clean up other hazardous substance disposal sites that have no viable responsible party.

The only tool currently available to the State to ensure cleanup when it is needed is an enforcement action against those who owned, operated, or contributed to old landfills. The Governor's proposal would avoid placing an unreasonable

burden on any one local government and allow us to use our resources for actual cleanup rather than legal action. When old landfill sites were in use, North Carolina citizens, businesses, and industries benefited from their existence as a place to dispose of waste. The surcharge on waste disposal is a way for citizens, businesses, and industries to form a partnership for cleanup and redevelopment of these old landfill sites.

There is great interest this session of the General Assembly in strengthening requirements for landfills permitted in North Carolina. I encourage you to take a close look at legislation that will be introduced, specifically this initiative and what it can bring to your jurisdiction.

If you have questions regarding the program for clean-up of old landfills, please contact Jack Butler, Chief of the Superfund Section, at jack.butler@ncmail.net or call (919)508-8450.

Sincerely,

DATE: April 30, 2001

TO: John Walch, PE, NCDENR Superfund Section

FROM: Rebecca Wallace-Aktas

RE: New Hanover County
Additional Research Requested

Please find enclosed the additional information requested for the following sites:

- Blue Clay Road Landfill
- Carolina Beach Refuse Disposal
- Castle Hayne Trash Service
- Kure Beach Refuse Disposal
- New Hanover County Landfill/Carolina Beach Landfill
- New Hanover County Landfill
- Rural Garbage Service
- Wilmington Landfill

Let me know if you have any further questions.

Also, I received your feedback on the other New Hanover County sites. I am embarrassed and apologize for missing the north arrows of the Figures. Actually the file copies here have north arrows, so it is a bit of a mystery.

I also wanted to let you know that I have tried repeatedly to get to Mr. Billy Hufham. I have spoke with his wife and son, but he is tough. I am going to try during the evenings, and we will be in Wilmington on the 11th and 12th of May for the North Carolina Environmental section meeting of the State Bar Association, so I will try to see him personally at this time.

As for Mr. Sellers, I should have been clearer in my reports. The Mr. Henry Sellers who wrote the letter to the county (return address of 1714 Colwell Avenue) is not listed in the telephone directory. I have contacted the other "H" Sellers listings to no avail. So I will write a letter in hopes of being able to meet with him the same weekend (May 11th - 13th) while I am in Wilmington. I apologize for not clarifying this issue.

The county landfill databases are moving along well. Mecklenburg County is in the final stages and should be completed shortly. Please let me know if you have any feedback or requests that might assist us in completing the lists. Based on the information I have completed to date, do you wish for me to complete a landfill listing for New Hanover County as well? Please advise.

I will return the corrected New Hanover County landfill reports for the remaining sites, ASAP.

RE: Landfill List for New Hanover County

Please find enclosed herewith the final listing for landfills in New Hanover County and the accompanying diskette. In course of conducting research to complete this list we contacted Mr. John Crowder of the NCDENR-Wilmington Regional Office; Mr. Ray Church of New Hanover County; Mr. Billy Hufham, former owner of Rural Garbage; Mr. Pete Davis, formerly of New Hanover County Health Department; and Mr. Frank Olive, formerly of the New Hanover County Health Department.

Altura collected a total of 45 landfill sites in New Hanover County; however, only 26 sites are sites which were not formerly investigated as part of other activities. Thus, you will only be invoiced for 26 sites.

Meanwhile, should you have any questions, please do not hesitate to contact me.

New Hanover County
Landfill Lists

Altura Site #	Site Name	Permit #	ID #	Address	City	Zip	Landfill Size	Property Size	Open	Closed	Operator/Owner	Pin Number	I/HWS	Comments	Lat.	Long	LCID
